Can you explain the benefits or disadvantages of digital technology in the 21st Century?

2 responses

Benefits - brings the world to us, can be very informative and educational.

Disadvantage - takes away from face to face contact. Uses a lot of unnecessary time. Dangerous websites and content

For this generation technology is predominantly used, so being familiar with devices and how to use them will better prepare them for the future. Although using technologies such as iPads and iPhones can become addicting for little ones and it can prevent them from becoming physically active I believe it is up to the parents to monitor the amount of fitness their children are getting as well as monitoring what apps and YouTube videos they may be watching/playing
